Description

Description:

Stress, fatigue, season changes, pregnancy and pollution can all cause transient hair loss. Novophane anti-hair loss lotion visibly reduces the rate of hair loss and stimulates regrowth, giving visible results as early as 6 weeks*. It stimulates scalp micro-circulation thanks to vitamin PP and regulates sebum production thanks to biotin, vitamin B6 and grapefruit and orange essential oils. Your hair rapidly regains its strength, vigour and volume. Easy to apply thanks to its pump bottle, it can be used on dry or wet hair and requires no rinsing. Designed for both women and men, it offers excellent skin tolerance and does not irritate the scalp. Its light texture is neither tacky, nor desiccant. It gives visible results, either alone or in combination with Novophane capsules.

Use:

Spray 6 times onto dry or wet hair, once per day for 3 months. No rinsing required. The short pump allows easy application to each parting.
