### Description

**Description:**

Advancis Refresh is a combination of antioxidants, vitamins and caffeine. Besides their protective, detoxifier and revitalizing role, these ingredients can help reduce the unpleasant sensation caused by alcoholic and tobacco intoxication or by excessive food intake. In addition, it restores energy levels, combats typical hangover fatigue, and relieves nausea.

**Use:**

1 tablet after waking, dissolved in a glass of water. In some cases, reinforce dosage with another tablet before lunch. Alternatively, as a hepatic protector, take 1 tablet before the intake of excessive alcohol or food. Take immediately after effervescence.
