Description

**Description:**

Designed for strip lashes, this adhesive is a latex-based formula that lasts several hours and can also be used for all-day wear with individual lashes. If residue is left on skin it can be easily removed with makeup remover.

**Use:**

Using the applicator, place the lash close to the natural lash line. Secure lash band by pressing onto lash line.

To remove, gently peel off lash strip starting at outer corner. Remove used adhesive from band and place lashes back on tray for re-use.
