Description

Description:

Stress, aging can cause a decrease of coenzyme Q10 in the body.

- Coenzyme Q10 or ubiquinone is a naturally occurring molecule in the body's cells where it ensures the production of body energy.
- Vitamin E displays anti-oxidant properties. It helps protect cells against oxidative stress by scavenging free radicals.

Coenzyme Q10 dosed at 100mg is associated here with natural vitamin E.

Use:

Swallow a capsule with a glass of water at breakfast time.
