Description

**Description:**

Arkogélules® Ispaghul (Mucivital) is a dietary supplement specially formulated to promote intestinal transit .

Ispaghul owes its effectiveness to the envelope that surrounds its seeds: in contact with water, this envelope swells, increasing the volume of stool and thus facilitating their evacuation . But beware, to keep its promises, Ispaghul must always be absorbed with a sufficient amount of liquid.

Thanks to its unique know-how, Arkopharma restores 100% of the assets of Ispaghul , which act in synergy with the greatest respect for your body.

**Use:**

Take 1 capsule 3 times daily with a large glass of water.

It is recommended to drink plenty of water during the period of use.
