Description

Description:

Arkopharma Arkocaps Passiflore used to reduce the nervousness of adults and children, especially in the case of minor sleep disturbances, and in adults in case of excessive perception of the heart beat (palpitations), after having eliminated any heart disease. Passionflower helps you find a calm and restorative night without waking up at night. It promotes sleep and relaxation.

Use:

Adults:

2 capsules in the evening, at mealtime and 2 at bedtime to take with a large glass of water. The dosage can be increased to 5 capsules per day if necessary, on the advice of your pharmacist.

Children over 12 years:

1 capsule in the evening, at mealtime and 1 at bedtime to take with a large glass of water.
