Description

Description:

Arkocaps® Red Vine is a dietary supplement specially formulated for people wishing to restore a feeling of light legs.

Building on its unique expertise, Arkopharma reproduces 100% of the active substances contained in the common red grape vine, which act in synergy in perfect harmony with your body.

The beneficial properties of red vine come from various substances found in its leaves, which help improve circulation and reduce the feeling of tired, heavy legs.

Building on their expertise in the field of phytotherapy, Arkopharma laboratories specially developed Arkocaps® Red Vine: an exclusive formula, based on ARKOTOTUM® Integral, which reproduces 100% of the plant's active ingredients while preserving its quality and integrity.

Designed and made in France, the Arkocaps® range offers you the best of nature. It is certified by an independent control agency that gives you the guarantee of high-quality products.

Use:

To be taken orally.
For adults only.
Take 3 capsules per day at mealtimes with a large glass of water.
