Description

Description:

Avène Anti-Redness Moisturizing Protective Emulsion

Avène moisturizing emulsion day cream is a moisturizing cream that promotes the protection of sensitive skin against external aggressions: wind, sun rays, cold etc. It ensures the well being of the skin and the reduction of redness. This moisturizing cream soothes feelings of irritation and heating. Designed specifically for sensitive skin, this day cream is also photoprotective SPF 20. It fights against UVA / UVB rays that cause the weakening of the cutaneous vessels.

Hypoallergenic, non comedogenic

Use:

Clean and dry the skin. Apply a hazelnut emulsion moisturizing day cream protective protector . Heat the cream in the hands and spread with a light massage.

Use daily in the morning.
