Description

Description:

Against the wrinkles installed, the loss of firmness and brightness, Laboratoires Dermatologiques Avène present Physioliift, a complete offer of anti-aging "architect" , to thwart the time firmly, in the purest respect of cutaneous physiology .

Physioliift offers a 24/7 solution with unique textures, which provide an intense pleasure to the application and contribute to the care action.

Physioliift Eyes fills wrinkles and tightens the skin around the eye.

Physioliift Eyes reduces puffiness and dark circles.

Physioliift Eyes is particularly suitable for fragile skin around the eyes. Its original patch texture releases the assets throughout the night, in a targeted way, without risk of migration in the eyes.

Its good tolerance has been tested on sensitive skin.

Very good eye tolerance

No perfume

Benefits:

- Fills wrinkles and tightens the skin around the eye. It benefits from the complementary action of ascofillin, mono-oligomers of hyaluronic acid and retinaldehyde: the skin recharged * with collagen and hyaluronic acid.
- Attenuates puffiness and persistent dark circles, thanks to the decongestant effects of dextran sulfate.
- Soothes: rich in Avene thermal water, soothing and anti-irritant

Use:

Apply Physioliift Eyes at night, by light tapping on the eye area, emphasizing crow's feet, and smoothing along the brow bone.
