### Description

**Description:**

Avène Physioliift Day Cream is an anti-aging cream that fights against wrinkles and the loss of firmness and luminosity. Formulated with ascofillin™, mono-oligomers of hyaluronic acid and pre-tocopheryl, Avène physioliift cream replenishes wrinkles and protects the epidermis against free radicals. In addition, to be a real shield against skin aging, this anti-aging care also helps to beautify the complexion. Enriched with micro-nacres, it helps to fade the traces of fatigue and the gray mine.

Hypoallergenic, non-comedogenic

**Use:**

Apply the physioliift smoothing cream once a day, in the morning, on the entire face, neck and décolleté.
