Description

Description:

The Cream SPF20 standardizing Nutri-replenishing SERENAGEUNIFIANT AVÈNE is a depigmentation cream that targets mature, refined, fragile, to make their flexibility and texture while unifying the complexion.

The skin regains a healthy and supple texture, the complexion becomes uniform and luminous:

- it plumps the epidermal tissue, and densifies the weakened epidermis, released, thanks to the fragments of hyaluronic acid (HAF) which reinforce the skin and fill the furrows.
- it nourishes the epidermis in depth, especially thanks to avocado oil and glycoleol, stimulating the natural synthesis of lipids continuously.
- It fades pigmentation defects, and brakes new tasks, thanks to the UNICORRECT protective complex.

Hypoallergenic, non-comedogenic, paraben free

Use:

Apply the SPF20 Serenage Nutri-Redensifying Regularizing Cream every morning on the face and neck.

Can be used as a makeup base.
