Description

Bio-Oil Dry Skin Gel replenishes the skin's barrier and deeply moisturises it.

Its unique gel-to-oil texture absorbs easily and creates a protective film to resist moisture loss and restore dry skin to its optimal hydrated state. With just 3% water, this highly potent formulation blends emollients such as shea butter and humectants like glycerine and urea, along with skin soothing ingredients such as vitamin B3 for an exceptional moisturising result.

Bio-Oil Dry Skin Gel is non-comedogenic (doesn't block pores) and gentle enough on sensitive skin. Not suitable for children under the age of 3.

Ingredients of Bio-Oil Gel:

- Glycerine: boosts hydration
- Shea Butter: nourishes and moisturises
- Niacinamide B3: helps protect skin moisture barrier

Bio-Oil Dry Skin Gel

- Urea: smoothes and softens
- Chamomile: soothes and calms

Use:

Dry Skin Gel can be used all over the body, and massaged in small circular motions until almost fully absorbed. Apply a small amount to dry skin as required. Use less than you would applying a cream.
