Description

Description:

Generates hydration: The patented biological complex Aquagenium™ generates intense hydration, immediately and lastingly:

- Vitamin PP strengthens skin resistance and impermeability
- Apple seed extract stimulates the activity of Aquaporins, which are the natural channels allowing water flow within the skin.
- The rich and creamy texture of Hydrabio Crème intensely nourishes the skin.
- Thanks to an emulsion inspired by the structure of the epidermis, the active ingredients of the Aquagénium™ patent penetrate deeply and in a more targeted manner. The skin thus regains its natural hydration capacities, for intense radiance. In a lasting way.

Smoothes skin texture: By eliminating dead cell and reducing progressively the corneum stratum thickness, the salicylic acid evens up and

Bioderma Hydrabio Crème

smoothes the skin, for a long-lasting radiant complexion.

Prevents from premature skin ageing: Vitamin E helps to protect the skin against oxidative stress and combat premature cutaneous ageing.

Use: Apply onto the face and neck in the morning and/or evening after cleansing and toning.
