Description

Description:

Instantly soothe and refresh your skin with the Bioderma Hydrabio Serum, everyday moisturising care for very dehydrated skin.

The formula offers intensive care with a 'flash' hydration effect. Harnessing the innovative Aquagenium® patent which restimulates the skin's ability to moisturise itself effectively, the skin appears brighter and is comforted. The non-comedogenic and hypoallergenic formula is further enriched with 15% glycerine and plumping hyaluronic acid, which holds essential water close to the skin.

How to Use:

Apply both morning and evening to skin that has been cleansed and toned. Use alone, or apply underneath your usual moisturiser to boost its effects
