Description

Pigmentbio Foaming Cream is a brightening cleanser that promotes the disappearance of dark spots and keeps them from reappearing. Rich in AHAs in addition to exfoliating micro-beads, it gently eliminates imperfections to reveal radiant skin. Moreover, the patented combination of active ingredients regulates the biological mechanisms that cause dark spots. Bioderma Brightening Cleanser is rich with moisturizing active ingredients. Thus, it leaves the skin comfortable.

Properties:

- Very good tolerance
- Tested under dermatological control
- Creamy foam
- Subtle fragrance
- Ideal for use on face as well as body.

Pigmentbio Foaming Cream
