Description

Description:

Sébium Pore Refiner is a correct concentrate pores dilated for the mixed skins with fatty. (Oily to combined skin)

Sebum excess, stress, tobacco, pollution... These are many factors responsible for the dilation and the deformation of pores. Expert in cutaneous biology, Bioderma research innovates and creates Sébium Pore Refiner. This corrective concentrate improves the aspect of the skin: textures gets finer, more regular, clearer, the pores are tightened, less visible. The exclusive patented Fluidactiv complex maintains the quality of the sebum and thus prevents the obstruction of the pores. The antioxidant agents preserve the natural radiance of skin.

The fluid and light formula of Sébium Pore Refiner melts instantaneously and leaves pleasant velvety finish.

Use:

Apply Sébium Pore Refiner once to twice a day, alone or before your moisturiser, either to the zone T (chin-nose-face) for the combination skins, or to the whole of the face for the skins with fatty tendency.
