Description

Description:

An iconic product with innovations. The first tanning water to appear on the market. This revolutionary Collistar invention, a truly iconic product, has now been updated with an even more pleasant texture and a higher-performance formula that combines distilled witch hazel with precious aloe milk and its extraordinary moisturizing, soothing and antioxidant properties.

The special spray makes it a genuine moisturizing and refreshing "shower", particularly useful when the sun is very strong and when there is nowhere to shower after swimming in the sea. It is perfect on its own or with a sun protection product to intensify the tanning action. It can also be used on hair, besides body and face, and is recommended with UV-A lamps to boost the tanning effect. This product does not contain a sunscreen and does not protect against sunburn.

Benefits:

- Practical, cool and extremely pleasant on the skin
- accelerates and intensifies tanning, thanks to the exclusive Unipertan® complex

Collistar Supertanning Water with Aloe Milk

- moisturizes intensely, fighting the drying effect of the sun, wind and salt
- reduces the feeling of heat and removes the irritating sensation of salt on the skin,
- provides instant coolness, softness and well-being.

Use:

Apply alone or in combination with a sunscreen.

Can be vaporized to soothe and refresh the skin exposed to the Sun, or enhance your Tan.
