Description

Description:

Correction® cream for skin rash is indicated for skin protection and moisturization, it works on preventing skin redness and irritations. Skin is exposed to inflammations in the wet area where fungi, bacteria in addition to friction, causes skin damaging and removal of the protective layer, provoking annoyance. Now for your comfort Correction® cream for skin rash is a non cortisone anti-inflammatory cream which helps in:

- Resisting dampness, fungus and bacteria.
- Zinc Oxide (10%), efficient in reducing skin irritations and redness.
- Lanolin to isolate your skin from contamination.
- Dimethicone water repellent making an efficient protective barrier.

Active Ingredients:

- Benzyl Benzoate provides prevention from Bacteria and Candida albicans which is a diploid fungus that grows in yeast and a causal agent of opportunistic oral and genital infections in humans.
- Zinc Oxide (10%), efficient in reducing skin irritations and redness.

Inactive Ingredients:

- Lanolin to isolate your child's skin from contamination.
- Dimethicone water repellent making an efficient protective barrier.
- Glycerin works as a moisturizing agent for the skin

Use:

Massage kindly on to the skin then leave to dry.
