Description

Description:

A groundbreaking multi-purpose peel developed with a blend of five naturally derived acids that gently resurfaces and renews even the most sensitive of skins in five ways in just five minutes. Mandelic acid refines texture, as lactic acid smoothes rough spots and eases the look of fine lines and wrinkles. Phytic acid brightens and evens out skintone, while salicylic acid unclogs pores and hyaluronic acid deeply hydrates. These industrious pads also physically buff away imperfections to uncover younger, fresher-looking skin with a newfound radiance. Dermatologist tested. Hypoallergenic. Paraben-free.

Use:

Every other day, up to three times each week, sweep single-use pad in a gentle circular motion over clean, dry skin from the forehead to neck, avoiding eyes and lips. Relax for 3-5 minutes, and then rinse with cool water. Follow with sunscreen in the morning, moisturizer in the evening, and see yourself in a whole, new light.
