Description

Description:

A non-irritating, illuminating treatment that poses a quadruple threat to uneven skin tone. Advanced exfoliators break down hyperpigmentation, as a targeted complex of 8 peptides, carefully selected for maximum efficacy, lighten the appearance of existing discoloration. Natural extracts inhibit melanin production to prevent new dark patches from developing, and proven protectors shield skin from spot-causing environmental stressors. Skin is left looking clearer and brighter with a lovely luminosity, smoothed texture and beautifully uniform tone.

Use:

1-2 times daily, apply 1-2 pumps to clean, dry skin on the face and neck. Follow with sunscreen in the morning, moisturizer in the evening, and prepare to enter a new age of enlightenment.
