Description

Description:

Pyrithione Zinc-enriched, known for its active bactericidal and fungicidal properties, liquid syndet, very soft, cleanses the skin: In everyday life, it cleans the skin to normalize excess sebum and is used to supplement dermatological treatments antiacne. During sports, it prevents the risk of microbial growth.

Dosed at 0.75% in Pyrithione Zinc, active agent microorganisms, the PyZn gel, recommended after any sports activity, limit bacterial growth and ensures perfect personal hygiene (Phtiriasis versicolor, wearing basketball ...). Very gentle cleansing base enriched with emollients provides a cleansing daily hygiene of oily skin, acne-prone or combination skin. The PyZn gel cleanses the skin and helps eliminate excess sebum. While respecting the hydrolipidic film, it leaves a light protective film on the skin. On the plant and enriched superfatting agents, it cleans and protects the skin every day, without irritating or drying damaged skin

Easy-to-rinse soap-free formula for improved tolerance and optimal cleansing activity.

Used:

Apply a small amount on face and body areas to treat, lather and leave on for a few seconds and then rinse.
