Description

Description:

Dermalia Sublimateur HD enhances the skin and restores a positive biological dynamic. It contains filling agents which leave a silky veil over the face to refine the skin's texture and visibly reduce the appearance of wrinkles and skin imperfections and a peptide- and lipid-based complex that activate the skin's underlying structures, improve firmness and help to lift features and redefine contours. The velvety texture of this product makes your skin feel incredibly soft.

Paraben-free

Dermatologically tested

Use:

Apply to the face, neck and décolleté as a day cream or make-up base.
