Description

Description:

Elancyl Firming Body Cream 200ml with ivy extract reinforces the elasticity of the skin and acts to firm the body skin.

As time goes by, the body skin undergoes alteration of its support fibres, becomes finer and is fragilized. It loses progressively its elasticity and tonicity.

The firming body cream allows to rebuild the structure of the skin. Thanks to its unique complex of plant-origin actives, with ivy and brown algae, it protects and stimulates the elastin and collagen fibers synthesis to strengthen the elasticity of the skin.

Visibly firmer, the skin appears supple and tonic.

Elancyl Firming Body Cream

Melting and enriched with Carthame oil, this cream moisturizes, gives a velvety aspect and a light perfume to the skin.

Use:

Apply on the whole body with light circular massages.
