Description

Description:

Elancyl Multi-Firming Body Care luscious cream lifts, firms-up and reinforces the elasticity of skin.

With time, body skin is subjected to several attacks which thin down and weaken its support fibres: gradually, skin becomes less toned and resistant. This care provides a complete firming - elasticity solution to restructure skin firmness:

- Its extract of brown algae leaves an elastic micro-mesh on the surface with an immediate firming and lifting effect.
- Moreover, its unique complex of actives protects and boosts the synthesis of elastin and collagen fibres to reinforce and restructure the skin.

Visibly toned up and firm, skin feels more supple, healthier and younger-looking.

In addition, this luscious refreshing cream enriched with safflower oil, nourishes the skin and leaves a delicately scented, velvety after feel. Dermatologically tested.

Usage:

Morning and evening, apply in light circular massages, evenly to the entire body, insisting in the most vulnerable areas (arms, thighs, stomach).
