Description

Description:

Elmex Children's Toothpaste has been specifically developed for the care and hygiene of baby teeth. It can be used from the onset of the first tooth of milk until the eruption of the first definitive tooth, that is to say around the age of 6 years.

Benefits:

- Forms a protective layer of fluoride on tooth enamel
- Makes teeth stronger against demineralization caused by cavities
- Helps to restore tooth enamel minerals lost after decay

Use:

Brush the child's teeth once a day until the age of 3 years. From age 3 to 6, brush or help the child brush their teeth two to three times a day.
