Description

**Description:**

This slow release action formula gel toothpaste contains Natural substances and has a unique combination of active natural ingredients that will leave you with a fresh and sparkling smile; additionally, it prevents and eliminates bad breath. It contains refreshing silica concentrated menthol MICROCRYSTALS that completely dissolve in your mouth while brushing your teeth, giving you intense feeling of lasting freshness.

Additionally, the microcrystals have a built-in cleaning action that is non-irritating for the gums and gentle on tooth enamel. The blocking action remains on the gums and teeth and continues to be effective for at least 5 hours, which is the average time between teeth cleanings. This product contains Xylitol, a natural non-cariogenic sweetener that has the special quality of not fermenting when coming in contact with oral bacteria available in the mouth, therefore, it doesn't allow for acids to form that corrode tooth enamel.

Free from: Fluorine, Parabens, Saccharin, SLES and SLS

**Use:**

Properly brush your teeth at least one minute after every meal.
