Description

**Description:**

Eucerin AQUAPORIN ACTIVE Revitalising Eye Cream provides deep and long-lasting hydration for a fresh, revitalised and radiant look. The formula with nature-identical Gluco Glycerol supports the skin's own moisture distribution channels, the Aquaporins. They transport moisture between the skin cells and help maintain skin's hydration balance. Enriched with Ginseng and combined with a cooling applicator, the formula also helps to counteract the appearance of puffiness and dark circles.

The result:

- The eye area is deeply hydrated for 24 hours and gets a fresh, revived look.
- Helps to counteract the appearance of puffiness and dark circles.

**Use:**

Gently apply Eucerin AQUAPORIN ACTIVE Revitalising Eye Cream with the cooling applicator. For an extra revitalising effect, keep the cream in a refrigerator before use.
