Description

Description:

Our hands are frequently in contact with water and cleaning products. Depending on the work we do, they may also be exposed to other chemicals. These factors can damage skin's barrier and cause skin to dry out and become tight and rough and prone redness, scaling and itchiness.

Eucerin AtopiControl Hand Cream smooths and soothes skin. The quick-absorbing and non-greasy formula has a unique active ingredient complex of soothing Licochalcone A, anti-bacterial Decanediol and itch-relieving Methoxypropanediol (MPD). This complex, combined with a high concentration of Ceramides and Avena Sativa (Oatmeal), strengthens skin's barrier, alleviates dryness and relieves the sensation of itchiness.

The formula is fragrance -free. Though widely valued for its soothing properties, some people can be allergic to oatmeal.

With regular use, skin condition noticeably improves and skin feels smooth and supple even with frequent washing.

fragrance-free, absorbs quickly, non-greasy

Use:

Cleanse skin with a mild, soap-free handwash
Use daily, or more often if needed
