### Description

Eucerin Even Pigment Perfector Spot Corrector is a non-greasy gel with a topical applicator that makes it easy to apply precisely to small areas of hyperpigmentation. It contains Thiamidol, an effective and patented ingredient that acts at the root cause of hyperpigmentation by reducing melanin production. Applied directly to dark spots, it is both clinically and dermatologically proven to reduce them and prevent their re-appearance. First results are visible after two weeks and improve continuously with regular use. Thus, skin appears more even.

### Use:

Use once a day (morning or evening) to well-cleansed skin

Apply sparingly and directly to dark spots

Avoid contact with eyes

Follow with the appropriate moisturizer

Apply Eucerin Even Pigment Perfector Spot Corrector once a day only. Use a maximum of four applications of products containing Thiamidol per day
