### Description

**Description:**

Eucerin Hyaluron-Filler Day Cream for normal to combination skin is an advanced anti-wrinkle formula for this specific skin type. The formula combines high and low molecular Hyaluronic acid to act at the origin of wrinkles, while bio-active Glycine-saponin supports skin's own production of wrinkle-plumping Hyaluronic Acid. SPF 15 + UVA protection effectively prevent premature ageing and the deepening of existing wrinkles. The skin looks visibly smoother. Create an excellent make-up base.

**Use:**

Apply in the morning onto the face, neck and décolleté by gently massaging the cream into the skin, avoiding the delicate eye area.
