Description

Description:

Eucerin Anti-Age Hyaluron-Filler Night Cream is an advanced formula night cream to target and plump up the appearance of even the deepest wrinkles.

Its formula contains two different types of Hyaluronic Acid to target all wrinkle types plus bio-active Glycine-saponin, to actively support the skin's own Hyaluronic acid. Concentrated Dexpanthenol supports the skin's own overnight regeneration process. Skin feels soft and well cared for.

Non-comedogenic.

Directions:

Apply Eucerin Anti-Age Hyaluron-Filler Night Cream in the evening onto well-cleansed face, neck and décolleté(chest), avoiding the delicate eye area.
