Description

**Description:**

Dermatologists use Hyaluronic Acid injections and skin peels to rejuvenate aging skin. Inspired by these treatments, Eucerin Hyaluron-Filler Night Peeling & Serum combines two powerful formulas for multiple anti-aging benefits:

**A refined skin texture and radiance:** The creamy emulsion contains an effective AHA (alpha-hydroxy-acid) Complex and Glycine Saponin. AHAs, many of them known as Fruit Acids, exfoliate skin while Glycine Saponin supports the production of Hyaluronic Acid in the dermal layer where deeper wrinkles originate.

**Moisturization and wrinkle-filling:** The transparent gel combines concentrated high and low molecular Hyaluronic Acid. High molecular Hyaluronic Acid works to smooth the external layers of skin while the low molecular Hyaluronic Acid (which is 40 times smaller) penetrates further into the epidermal layers where deeper wrinkles originate.

The two formulas combine on your skin to make it feel smooth. This innovative product is designed to be used overnight and, when used regularly, Eucerin Hyaluron-Filler Night Peeling & Serum is clinically and dermatologically proven to refine skin texture and promote skin cell

renewal while plumping up even the deepest wrinkles. Skin is smoother and more radiant and pores are refined.

**Features:**

- Non-comedogenic,
- Lightly-fragranced

**Use:**

Apply once a day, in the evening, to a well cleansed face, neck and décolleté

Press the top of dispenser in the middle to release the optimum combination of both formulas

Mix the two formulas together in the palm of your hand

Avoid direct contact with your eyes

The product may increase skin's sensitivity to the sun so ensure you use a minimum SPF 30 day cream every day after using the product and for a week after use.

For best results, use in combination with other products in the Eucerin Hyaluron-Filler range
