Description

Description:

Eucerin pH5 Skin-Protection Lotion is a gentle yet effective lotion specially formulated for the needs of sensitive skin, providing 24-hour moisturisation. The formula contains 5% Dexpanthenol, an active ingredient that stimulates skin regeneration and strengthens skin's natural defences. It protects skin from irritation, has wound healing properties, and boosts skin's natural moisture production with every use. Use daily for long-lasting protection and soft, smooth skin.

Use:

Apply daily (or more regularly if appropriate) after showering or bathing.
Massage gently until completely absorbed.
