### Description

Eucerin Photoaging Control CC Tinted Sun Cream Medium is an everyday facial sunscreen that gives all skin types that are medium in tone an even, naturally tanned-looking appearance. The Advanced Spectral Technology combines broadband and photostable UVA and UVB filters for very high UV protection with Licochalcone A. Thus, it neutralizes free radicals that UV and HEV light cause. The tinted sunscreen also includes Glycyrrhetic Acid which supports skin's own DNA repair mechanism.

The Hyaluronic Acid and mineral pigments in the formula instantly unify the complexion and visibly reduce signs of aging such as fine lines or an

uneven skin tone.

Eucerin Photoaging Control CC Tinted Sun Cream Medium is with no perfume. Moreover, it has a pleasant light texture that absorbs quickly. Clinical and dermatological studies prove very good tolerability on sensitive skin.

**Use:**

Apply in the morning after, or instead of, your regular day care product.
