Description

Description:

Dry sensitive skin is easily irritated by environmental triggers, making it even more sensitive. It requires more than gentle cleansing to become less sensitive.

Eucerin pH5 Shower Oil has been specially developed with extra mild surfactants suitable for cleansing dry sensitive skin. The unique Eucerin pH Balance System gives the formula the optimal pH to protect skin's natural defenses and preserve its resilience.

Rich in natural caring oils, it replenishes lipids, leaving skin feeling pampered and silky soft, and stops it from drying out even after frequent use.

Use:

Use alongside Eucerin pH5 care products for best results
Avoid contact with eyes. If product gets in your eyes, rinse off with water.
To avoid slipping, rinse bath thoroughly after use.
