Description

**Description:**

Eucerin Sun Fluid Mattifying SPF 50+ is an innovative facial sunscreen that is specifically formulated to protect against sun-induced skin damage and pigment spots. For normal to combination skin. Water-resistant.

This advanced sunscreen combines multiple cutting-edge technologies to provide expert protection against UV damage:

A highly effective, photostable, UVA/UVB filter system with Tinosorb S provides reliable protection against sunburn. EU- and Cosmetics Europe – The Personal Care Association (formerly called Colipa)-compliant.

Glycyrrhetic Acid protects DNA by supporting the skin's own DNA protection and repair mechanisms.

Cellular protection comes from Licochalcone A - a powerful antioxidant that protects the skin cells against damage caused by free radicals.

The ultra-light, non-greasy texture mattifies the skin and does not leave an oily shine. It even works well in warm, humid climates.

**Directions:**

Apply generously before sun exposure & reapply frequently, especially after swimming, toweling and sweating to maintain the original protection. Insufficient quantity of sunscreen applied reduces the protection effect.
