Description

Description:

Eva Lactic Ovules quickly and effectively adjust the vaginal pH to the normal level. In the form of suppositories immediate restores and maintains the vagina's natural balance while relieving the symptoms of itching, burning and irritation.

Indications:

For the regulation of vaginal pH and its normal acidic value when this has been disrupted due to:

Bacteria or fungal vaginal infections

Long term treatment with antibiotics or contraceptives

After the menstrual period

To enhance the body's natural defense mechanism and prevent problems associated with disrupted vaginal pH value, especially during menopause.

It contains lactic acid, glycogen, chamomile and aloe extracts.

Without hormones and pharmaceuticals

pH 3,8

BT x 10 vaginal suppositories

Use:

Therapeutically: To adjust the pH value when vaginal balance has been disrupted. One application per day for 7 days, preferably before

bedtime.

Preventively: To maintain vaginal health one application per week, whereas after the menstrual period, one application per day for 3 days.
