Description

Description:

Intensive Anti-Age Transdermic Care for mature skin with marked microrelief. Retinyl Palmitate stimulates cell renewal and fosters skin regeneration with smoothing effect; Tocopheryl Acetate plays a strong antioxidant, anti-ageing and restoring function; Calcium Gluconate supports the exchanges between the cells and optimizes their functions; Ozonized Oleic Acid conveys oxygen in the form of ozone, thus improving cellular respiration and metabolism; Folic Acid contributes to the synthesis of amino acids and nuclear acids; Riboflavin intervenes in the metabolic processes and in cell energy production.

Size: 30 ml bottle with dispenser.

Use:

Use preferably in the evening after cleansing. Smooth onto face and neck and follow with the Anti-Age Renovating Smoothing Cream.
