Description

**Description:**

Fillerina Breast Firming is a cream treatment for breast toning and firming, perfect as a maintenance treatment after using Fillerina Breast Firming intensive treatment. It can also be used alone, between two Filler Breast Volume treatments. With 6 hyaluronic acids.

Dermocosmetic breast clamping action for home use hyaluronic acids having 6 high penetration.

The Fillerina Breast Firming is an intense dermocosmetic treatment firming action and improve breast shape. The particular concentration of 6 hyaluronic acids of different molecular weights promote firming and stimulate the breast. Thanks to their ability to penetrate the skin (clinical ex-vivo study on six different molecules), the patented hyaluronic acid synthesis Fillerina penetrates the intermediate and deeper layers of the skin, improving the volume and firmness.
