Description

Description:

A dull and opaque skin is often the result of an insufficient cellular turnover: epidermal cells get old and thicker, thus depriving the skin of its transparency and brightness. Vitamin C, which has been inserted in the preparations of the Clarifying line, has a strong clarifying power and characterises all the formulations. Moreover, due to the process of skin ageing and to repeated exposure to sun rays, melanin produced by melanosomes accumulates in some areas, thus creating cutaneous spots: to actively work on these spots, specific highly penetrating and very effective molecules have been inserted in the anti-spot preparations.

Clarifying Enlightening Transdermic Care for Dull, Listless Skin. Sodium Ascorbyl Phosphate has a strong clarifying effect due to inhibition of the tyrosine synthesis; Oligopeptide-68 has a whitening effect contrasting the pigmentation process; Acetyl Cysteine is a precursor of Glutathione, which has a strong anti-tyrosinase activity

Size: 50 ml jar.

Use:

Use morning and/or evening on both face and neck, then massage with upward movements until complete absorption. To be used alone or after the Ultra Enlightening Clarifying Serum
