Description

Description:

Fillerina Plus Night Cream is a daily treatment with a filler effect all over the face. Nourishing, to be used alone or in combination with other Fillerina Plus preparations.

Available as grade 4 or 5 depending on skin type.

Fillerina Plus Night Cream plumps up visible wrinkles while maintaining volume in the cheekbones and lips with the six Hyaluronic Acid molecules. Incredibly gentle to the skin yet powerfully effective, this revolutionary anti-aging night cream provides magnificent moisturizing hydration while simultaneously reducing the appearance of expression lines and loss of volume in the cheekbones and lips.

With skin-nourishing ingredients like Shea Butter and Wheat Germ Oil, Night Cream also utilizes Sweet Almond Oil, Rose Hip Seed Oil and Vitamin E to correct the damage that occurs to the skin in everyday life. Night Cream is to correct visible lines and visible loss of volume while caring for the rest of the complexion.

Use: Apply in the evening on a cleansed face. Avoid contact with eyes.

Tip: For optimal results, use in conjunction with the Fillerina Plus Day Cream Grade 5 at the day and the night Cream at night. The skin will continue to build the hyaluronic acid molecules and improve over time.
