Description

Description:

A multi-action skincare to restore skin evenness at 360° and reveal a luminous and pure complexion.

Rich cream texture – matte finish.

Gradually, dark spots are reduced, the complexion becomes even and the skin looks brighter.

Benefits:

Dark spot correction³[immediate + powerful + long-lasting]: Minerals immediately make dark spots less visible, hexylresorcinol, a powerful brightener, provides effective correction, and an antioxidant polyphenol limits their reappearance.

Color-control evenness³ [anti-yellow + anti-grey + anti-red]: An anti-glycation peptide acts to remove complexion yellowness, exfoliating gluconolactone works to remove the grey tones, and soothing vitamin B3 reduces redness.

Light revealer³ [smoothing + hydrating + revitalizing]: - Smoothing and stimulating vitamin C combined with a moisturizing polysaccharide to revive the skin's radiance.

Filorga Pigment-White

Use:

Apply daily, in the morning and/or evening on the whole face, focusing on dark spots. For an intensive treatment, use PIGMENT-WHITE after PIGMENT-PERFECT serum for at least 12 weeks. For all skin types.
