Description

Description:

A cell renewal booster for rejuvenated skin, night after night.

Indicated for: wrinkles, dullness, imperfections, pores

Ultra-soft velvety texture.

Benefits:

Gentle resurfacing: a cocktail of 6 hydroxy-acids (AHA and BHA) combined with soothing brown algae to gently resurface the skin.

Radiance revealer: a brightening plant extract to reveal a luminous complexion.

Reinforced action [pores + shine]: a sebum-regulating complex to refine the pores and leave the skin matte.

Use:

Apply on a clean face every evening, or alternate every other day if you have sensitive skin. Avoid the eye area and direct contact with eyes. Do not apply on damp skin or open wounds. Slight tingling after application means the anti-aging ingredients in the SLEEP AND PEEL® cream are working. If you experience intense burning sensations, rinse the face with cool water and stop using the product. Do not combine this product with other potentially irritating or sensitizing skincare products.
