Description

Description:

Filorga UV-Bronze Face Anti-Ageing Sun Fluid SPF50+ 40ml is a very high sun protection for mature skins, acting against skin ageing and dark spots.

Its fluid formula with non-greasy texture offers several actions:

- global anti-ageing shield [photo-activated technology]: a powerful antioxidant that acts under the sun rays to put the skin under high UV + IR protection and thus reduces the signs of ageing.
- anti-wrinkle action: the formula enriched with sulforaphane acts on the formation of wrinkles for a smoother skin with each exposure.
- anti-dark spot action: the vitamin PP-enriched treatment acts on the spots for a more homogeneous skin and a more uniform tan.

Use:

Apply evenly on the face before sun exposure.
