Description

### **Description:**

Flexitol Hand Balm for very dry skin contains 10% Urea in a rich moisturizing base to care for very dry hands. This nourishing formulation has been developed in conjunction with dermatologists to soothe itchy, irritated skin while protecting your hands from the damaging agents that can cause excessive moisture loss. Improved non-greasy

formula.

The formula has been fortified with Vitamin E to replenish your skin from the first application and condition the skin from free radical damage. Unlike many other moisturizers, it is richly formulated, so a little goes a long way!

**Benefits:**

- Use on dry, scaly & itchy hands to leave skin soft and protected
- Great for hands affected by cold weather and harsh detergents, or those who suffer from dry hands as a side effect from medications
- Suitable for moisturizing patches of dry skin including Eczema & Psoriasis
- Also suitable to use in conjunction with sunscreen with any SPF
- Can be used on other areas of the body such as arms, legs, elbows and back

**Key ingredients:**

- 10% Urea improves the degree of hydration in the skin by increasing the water uptake from the dermis level of the skin and enhances the skin's water binding capacity
- Emollients such as Lanolin, Glyceryl stearate and Decyl Oleate penetrate underlying skin, creating lasting softness and smoothness. Together they work to restore and maintain the moisture balance of the outmost layer of skin

**Use:**

Gently massage into hands two to three times daily or as directed by your healthcare practitioner. Richly formulated so a little goes a long way.
