Description

Description:

GLIZIGEN Spray is a unique formulation designed to fight all infection caused by herpesvirus (genital and oral herpes, varicella-zoster virus) and human papilloma virus.

Features:

Natural ingredients only .

It relieves the symptoms from the first day.

It has a tolerance of 100%.

Absence of side effects.

It has anti-ulcerous, anti-viral and interferon induction.

It inhibits protein phosphorylation by Kinase P.

It binds directly to Kinase P to reduce kinase activity It prevents the viral growth of several DNA (herpes virus) and RNA viruses, including varicella-zoster virus.

Its anti-inflammatory activity may be attributable to the inhibition of prostaglandin E2, production.

Results are observed by visual examination and corroborated in the laboratory after 5 days.

It facilitates the regeneration of the erosions and ulcerations in 4 - 5 days.

Quick and easy to apply.

Gligizen Intimate Spray

Does not produce irritation.
