Description

Description:

For labial problems. GLIZIGEN LABIAL is a product that is marketed as a highly moisturizing lip cream indicated in case of cracking, sensitive lips and viral problems.

Glizigen is a new specific product created by Laboratorios Catalysis that allows treating viral viral infections such as those of the lips (hence its two presentations). Its activated components - mainly glycyrrhizinic acid, with well-known antiviral properties - help a rapid recovery as well as rehydrate and regenerate the epithelial tissue producing a quick sensation of relief. CATALYSIS has discovered a new formulation to combat all INFECTIONS CAUSED BY HERPES in its various forms (genital, varicella-zoster, labial, ...)

Use:

Apply regularly on the lips. If necessary, 3-5 applications a day will quickly improve its appearance.
