Description

GlobiFer Forte is a natural food supplement with a unique low-dose iron formulation containing both heme and non-heme iron. Thus, it quickly and efficiently corrects iron deficiency. Moreover, it helps maintain the hemoglobin level. The addition of heme iron increases iron absorption. Thanks to the addition of heme iron to GlobiFer, less non-heme iron is required. Even with 2 tablets of GlobiFer forte per day, the iron level stays well below the UL, resulting in good tolerability.
