Description

Description:

Cobalamin, or Vitamin B12, is an essential vitamin needed for red blood cells formation and neuromuscular functioning. Cobalamin also improves iron utilization, and is used to prevent and treat pernicious anemia. It is also needed for normal growth and development. In addition , Vitamin B12 significantly improves energy production and reduces asthenia and fatigue.

Use:

Take 1 to 3 capsules per day with a full glass of water, or as directed by your physician. Capsule could be opened and sprinkled over any food or drink.
