Description

Description:

Green Made Maxi K contains 50mcg vitamin K2 (MK-7) and 1400IU vitamin D3, both known to be essential for normal calcium utilization. In addition, the latest research shows that vitamin K-dependent proteins responsible for healthy tissues.

In bones, MK-7 activates osteocalcin, a protein required to bind calcium to the mineral matrix, thus strengthening the bones. MK-7 also works in combination with vitamin D to facilitate the function of osteoblasts, the bone building cells.

In circulation, vitamin K2 activates Matrix Gla Protein (MGP), the most potent inhibitor of arterial calcification, lowering the risk of atherosclerosis and cardiovascular disease.

Maxi K is an essential part of your healthy lifestyle to improve your bone health and prevent cardiovascular disease.

Direction:

Take one capsule per day, with your largest meal, or as directed by your physician.
